DIRECTORY LIBRARY FOR FREE USE OF PUBLIC AT
LETHBRIDGE PUBLIC LIBRARY

INTRODUCTORY

The present volume for the year 1962 is the twenty-second edition of Henderson's Directory of Medicine Hat, the first being in 1914.

The three major departments are arranged in the following order:—

I. THE BUYERS' GUIDE, printed on yellow paper, constitutes the first major department of the Directory. This embraces a complete list of the names and addresses of the business and professional concerns of the city, arranged in alphabetical order under appropriate headings — a catalog of all the activities of the city. Preceding this catalog, likewise grouped under appropriate headings, are the advertisements and business cards of firms and individuals desiring to present a more complete list of their products or services than is possible in the catalog itself. The Buyers' Guide represents reference advertising at its best, and merits the attention of all buyers and sellers seeking sources of supply or markets for goods.

II. THE ALPHABETICAL LIST OF NAMES of residents and business and professional concerns is the second major department, printed on white paper. This is the only record in existence that aims to show the name, marital status, occupation and address of each adult resident of Medicine Hat, and the name, official personnel, nature and address of each firm and corporation in the city.

III. THE DIRECTORY OF HOUSEHOLDERS, INCLUDING STREET AND AVENUE GUIDE, printed on green paper, is the third major department. In this section the named streets and avenues are in alphabetical order followed by the numbered streets in numerical order; the numbers of the residences and business concerns are arranged in numerical order under the name of each street, and the names of the householders and concerns are placed opposite the numbers. The names of the intersecting streets appear at their respective crossing points on each street. Special features of this section are the designation of tenant-owned homes and the designation of homes and places of business having telephones.

ADVERTISING MEDICINE HAT

An important function of the Directory is to set forth the characteristics and advantages of the city as a place of residence, as a business location, as an industrial site, and as an educational centre. The Directory acts as a mirror, reflecting all that is noteworthy in the city in the above respects. In order to spread this information regarding the city, the publishers have placed copies of this issue of the directory in libraries across the country where they are readily available for reference use by the public. There they serve as perpetual advertisements of Medicine Hat, for businessmen the country over realize that the City Directory represents the community as it really is.

ESTIMATED POPULATION OF MEDICINE HAT, 24,621

This Directory estimate of population is based on the 1961 Dominion Census of 23,414. The Medicine Hat City Directory covers considerable territory beyond the metropolitan area, which is canvassed in order that the names of all people employed or who purchase in Medicine Hat may be obtained.

Respectfully, The Publishers,

August, 1962

HENDERSON DIRECTORIES LIMITED

PUBLISHERS' NOTE

The information in this directory is gathered by an actual house to house canvass, and is compiled in a way to insure maximum accuracy.

The Publishers cannot and do not guarantee the correctness of all information furnished them nor the complete absence of errors and omissions, hence no responsibility for same can be or is assumed.

The Publishers earnestly request the bringing to their attention of any inaccuracy so that it may be corrected in the next Directory.

MEDICINE HAT, Alberta

(By courtesy of the Chamber of Commerce)

LOCATION

The City of Medicine Hat is beautifully situated in the Valley of the South Saskatchewan River, almost midway between Moose Jaw, Sask., and Calgary, Alberta. It covers an area of over 10,000 acres, and is the trading centre for a very large farming and ranching territory. It's position as the main distributing point of South Eastern Alberta is clearly indicated by the fact that it is a divisional point on the Canadian Pacific Railway's transcontinental main line, and also the junction of that line and the Crow's Nest Pass line of the same Railway. In addition, it is situated on the Trans-Canada Highway, where the latter is joined by Highway No. 3 from Lethbridge and points West. The City also owns and operates it's own airport, which is served by Trans-Canada Airlines.

HISTORY

Medicine Hat had it's origin with the extension of the Canadian Pacific Railway, which reached this point in 1883. It was incorporated as a town in 1899, and by 1907 was formally incorporated as a City. The period of 1907 to 1914 was an era of greatest expansion that was only culminated by the outbreak of the First World War.

Population trend during the period between the two wars was not particularly marked, but in recent years, it has shown a steady and rapid climb. From a figure of 9,529 in 1940, the population has grown to the present estimate of 24,621.

NATURAL GAS

This is the City's most valuable resource. In 1892, when a C.P.R. work gang was drilling for water, gas was discovered. In 1905 the City interested itself in drilling a test well, and an enormous supply of dry gas was found at a depth of 1,000 feet. It was then decided to develop this resource on a municipal basis and it has proved to be the main feature of attraction to industry, which was not slow in taking advantage of a cheap sources of fuel, which is available to the largest users at a rate equal to coal at \$1.00 per ton.

POWER

Owing to the possession of natural gas, the City has been able to produce electrical power by steam turbine at a relatively low cost.

Up to 1953 our electrical potential had been 12,200 KW, but with the completion of a substantial addition to the power plant and the installation of a new steam turbine generator an additional 30,000 KW has been added. By agreement with Calgary Co. surplus power thus generated will be made available to their network, but the plant is under City ownership, with an agreement providing for local industrial needs as they develop.

WATER

Ample water is provided by the City Utility supplies being obtained from the South Saskatchewan River, on the banks of which the power plant is situated. The reservoir has a capacity of 3,750,000 gallons. Domestic consumption which is very high, is not metered, being on a flat rate basis of \$1.75 per month for a dwelling of 5 rooms or less, plus 15c per month for each additional room.

An additional supply of abundant cooling water for industrial purposes was discovered in 1959 whereby an underground river serviced by pumps will provide a maximum potential of 10 million gallons of water per day average in temperature from 40 degrees F. to 55 degrees F.

COAL

Within a few miles of the city limits are vast quantities of high grade lignite coal, which is being mined and distributed to the surrounding country at an exceptionally low cost to the consumer.

MEAT PACKING HOUSES

A new packing plant, Alberta Western Beef Co., costing one and one half million dollars will be in operation before the end of the year, employing 50 to 60 people.

INDUSTRY

With its location on the main line of the Canadian Pacific Railway, and on the Trans-Canada Highway, Medicine Hat offers manufacturers speedy handling of freight and express East and West. In addition, ample supplies of cheap fuel and power, coupled with abundant water, makes the city an ideal location for industrial enterprise.

From the time that Natural gas was discovered the City has attracted large industry, the main types being as follows:

Chemicals:

The Northwest Nitro Chemicals Limited, whose \$22,000,000 plant was established here in the fall of 1953, produces ammonium phosphate and ammonium nitrate fertilizers which are marketed throughout the four Western Provinces of Canada and the Northwestern States of the U.S. It employs 350 people, with a payroll of approximately \$1,000,000 per annum, and has a capacity of 140,000 tons of chemical fertilizer per annum.

Clay Products:

This is one of our leading industries and the one most local in character, as large clay deposits are on hand to supplement other supplies of raw material shipped in from outside points, principally Saskatchewan.

There are five modern plants employing 450 workers, turning out large quantities of ceramic wares as follows:

Hycroft China Ltd.—Earthenware dishes and fancy material.

Semi porcelain dinnerware.

National Porcelain Ltd.—Porcelain insulators.

Medicine Hat Brick & Tile Co. Ltd.—Plant No. 1—Brick, Building

Tile, Etc. Plant No. 2—Vitrified sewer pipe, flue lining, Etc.

Sunburst Ceramics Ltd.—Ceramic Lines—Crocks, Etc.

Flour Milling:

Medicine Hat is one of the leading milling cities of Western Canada, with three mills, possessing a daily capacity totalling 5,000 barrels of flour a day, as well as breakfast cereals, animal foods, and by-products.

The three mills, employing 220 people are as follows:

Company	Bushels Capacity
Maple Leaf Milling Co. Ltd.	500,000
Ogilvie Flour Mills Co. Ltd.	500,000
Alberta Linseed Oil Co. Ltd. (Linseed Oil, Oil Cake and Meal)	155,000

Greenhouses:

Due to its abundance of sunshine, and cheap fuel Medicine Hat has attracted greenhouse production. There are at present some sixteen greenhouses operating here, with a total of twenty-three acres under glass, including the Medicine Hat Greenhouses Ltd., possessing 10½ acres and being the second largest greenhouse in Canada. From these are produced an annual revenue of \$1,500,000 from the sale of flowers and vegetables from the Great Lakes to the Pacific Coast.

In addition to the greenhouses proper many large irrigated gardens produce summer crops of vegetables, including an excellent variety of table corn for which this city is famous.

Metal:

Medicine Hat has a foundry owned by T. McAvity & Son Ltd., in which fire hydrants and other types of metal work is produced. The S. F. Scott Manufacturing Company and Wittke Iron Works make ornamental iron and Success Automatic Land Leveller Company Limited turns out implements designed for irrigation farming purposes.

Electric:

The J. A. Wilson Lighting and Display Company Limited established their only western manufacturing and distributing branch in Medicine Hat early in 1960. All types of special lighting equipment and chrome display items will be manufactured here for distribution to the western market.

Rubber:

In 1960, the Goodyear Tire and Rubber Company Limited located their western manufacturing branch in Medicine Hat. A fully, up to date plant costing \$4,500,000 was formally opened on June 15, 1960, and is engaged in the manufacture of passenger car tires with an anticipated capacity of 2,000 tires per day.

BANKING INSTITUTIONS

Branches of the following chartered banks are located in this City: Montreal; Royal; Toronto-Dominion; Canadian Imperial and Nova Scotia.

RANCHING and FARMING

Long before the advent of the farmer, ranching had been followed extensively in this area. The district is the centre of the "Short Grass" country, whose prairie wool produces beef of unrivalled quality. Large cattle ranches still operate in the area utilizing open ranges that would otherwise be unsuited to farming, and the monetary returns from annual beef sales accounts for no little portion of the cash income of the City businesses.

The area devoted to farming is very wide, and while the district is a hazardous one, due to lack of assurance of sufficient annual rainfall, substantial quantities of wheat invariably of No. 1 quality, are grown in the district.

To overcome the hazards of drought there are two irrigation schemes which will ensure the Western district of Medicine Hat's farming territory of the required moisture. The St. Mary-Milk River Development will irrigate approximately 100,000 acres in the Medicine Hat trading area south of the South Saskatchewan River, while approximately 60,000 acres will eventually be opened up for irrigation farming north of the same river when the Eastern of the Bow River Development is completed. The main canal of the St. Mary-Milk River Scheme reached the confines of Medicine Hat in 1954, and from that time on steady increases have occurred in the irrigated area with particular reference to irrigated pastures and the growing of row crops.

GENERAL

The city contains 4 wholesale, fruit and grocery houses and also enjoys all the retail outlets usual to a community of its size including 32 groceries, 9 drug stores, 14 ladies' wear establishments, 8 men's apparel shops, 8 foot wear stores, 7 jewellers, 6 hardwares and several variety stores. Department stores owned by T. Eaton Co. (Western) Ltd., Simpsons-Sears and McLeods Ltd., are also located here.

There are approximately 7,000 homes located here, 73% of which are family owned dwellings. New homes are being erected at the rate of about 240 per annum. Approximately 6,500 people are gainfully employed, the labor force being subject to increase during a considerable portion of the year by farm workers.

Ample facilities for comfortable living are provided by six beautiful parks, three up to date outdoor swimming pools, two golf courses with grass greens, a hockey and skating arena, an 8 sheet curling arena.

tennis courts, two bowling greens, etc., while there is easy access to excellent hunting and fishing grounds. The Medicine Hat stampede, a three day annual event is widely patronized and is considered second only to the famous Calgary stampede.

Medicine Hat built the first hospital between Winnipeg and Vancouver in 1889. In 1957 this was replaced by a new 250 bed municipal hospital which, together with a new nursing home, provides for the hospital needs of a large area. St. Josephs home and the Baptist Haven of Rest take care of the needs of our old citizens. Further help in this direction has been provided by a government sponsored old folks home which was opened in the fall of 1960. Excellent medical and dental care is available as well as other healing methods such as chiropratic.

Ample educational facilities are provided by the Medicine Hat composite High School, the Alexandra Junior High School, nine public schools, three separate schools including a high school with an additional elementary school in construction, a bible college and a business college.

An excellent library is operated here with other facilities for the young and old. Two theatres and one drive-in theatre take care of recreational needs of the community.

All religious denominations are well represented here and the City possesses several imposing church edifices. Among the denominations most largely represented are Anglican, Presbyterian, Roman Catholic, United Church, Baptist, Christian Science, Lutheran and Jewish.

REDCLIFF

POPULATION

Approximately 2,206

Distributing Area

In what must eventually become the manufacturing belt of Western Canada, Redcliff occupies a most prominent position through its immeasurable advantages over the other places.

Within a radius of from a hundred to two hundred and seventy-five miles of Redcliff are Calgary, Edmonton, Regina, Saskatoon, Moose Jaw, Swift Current, Weyburn, Battleford, North Battleford, Athabasca and Lethbridge. And between all these hundreds of smaller towns and villages are clamoring for the products Redcliffs factories will distribute.

CITY ADMINISTRATORS

Town Hall: 3rd Street N.E.

Mayor—Alfred Dutton

Secretary—Frank V. Britt

Chief of Police—Joseph Cartmell

Sanitary Inspector and Poundkeeper—James Dacre

Fire Chief—Arthur Rieger

NATURAL RESOURCES

Natural Gas

Redcliff has an unlimited supply of Natural Gas, containing 1,100 B.T.H. units per cubic foot. This is supplied to manufacturers at five cents per thousand feet (equivalent to coal at a cost of one dollar per ton); and to domestic customers at a correspondingly low rate.

Clay Deposits

Redcliff has already attained distinction in the production of bricks that are hard, durable and capable of heavy weight and severe resistance. Dry-pressed, wire cut, fireproofing, hollow and all kinds of fancy building brick are manufactured. Three large plants are operating throughout the entire year. Redcliff has all the raw materials for high-grade pottery, Portland cement and other allied lines of manufacture.

Cheap Power

Nature has given Redcliff a strong advantage in its possession of cheap power (2.4 per horsepower, per annum, per ten-hour day). Cost of production is reduced to a very low point. In the grind of competition, Redcliff's manufacturer has a safe margin of profit on this basis alone. Redcliff's inexhaustible supply of pure water is one of the crowning features of that combination of resources which makes well-balanced development not only possible, but inevitable. Water from the Saskatchewan River is passed through natural system of filtration. A reservoir capacity of 300,000 gallons and efficient distribution to all parts of the city is already accomplished.

Unique Industrial Opportunity

Redcliffs level, accessible area makes possible the grouping together of allied industries, with all the advantages of easy shipping and distribution for a fraction of the cost involved in other places. "Overhead" charges growing out of the cost of construction at points where territory is uneven, and where other natural disadvantages have to be overcome, are eliminated at Redcliff.

GOVERNMENT OF CANADA

(General Election of June 18, 1962)

Alberta Members of The Canadian House of Commons

Jack H Horner (Acadia)—PC res Pollockville
 F J Bigg (Athabaska)—PC res Westlock
 Clifford Smallwood (Battle River-Camrose)—PC res Irma

Legislative Counsel—J W Ryan

Asst. Legislative Counsel—W E Wood

System of Street Names and Numbering

The city has been divided into four sections, namely: North-East, North-West, South-East, and South-West. North-East is north of the Saskatchewan River and east of Division Avenue North abbreviated NE. North-West is north of the river and west of Division Avenue North, abbreviated N.W. South-East is south of the river and east of Division Avenue South, abbreviated S.E. South-West is south of the river and west of Division Avenue South, abbreviated S.W.

The number of the street will indicate the distance from Division Avenue North or South as the case may be. The abbreviations N.E., N.W., S.E. and S.W. will be used accordingly, the river being the dividing line east and west.

The avenues are numbered from West Road Allowance which will be known as Division Avenue. On the north side of the river the other avenues will be First, Second, etc., North-East or North-West according to whether east or west of Division Ave., while in the south side of the river the other avenues will be First, Second, etc. South-East or South-West according to whether they are east or west of Division Avenue. North of the river Division Avenue is to be known as Division Avenue North and South of the river Division Avenue is to be known as Division Avenue South.

South Railway St. and North Railway Street retain their names. The streets on the hill and west of the C.P.R. tracks, formerly known as 5th A, B, C, and D, are now changed to Aberdeen, Belfast, Cambridge and Dundee. On the east side of the C.P.R. tracks the streets formerly known as 5th, A, B, C, D, E, F, and G, are now changed to Braemar, Balmoral, Ross, Yuill, Dominion, Queen, and Elm. The portion of 6th Street which lies east of the C.P. tracks is now known as Bridge Street.

In numbering the streets it was found best to begin not with 100, as was first planned, but with 1. Thus in the first block from the dividing avenue or the river the numbers begin with 1. In the second block they begin with 101, and in this way the number of the block is always one more than the first figure or figures of the street number. Thus number 532 would be in the sixth block.

In determining location with the new names and numbers it will be necessary to remember several things:

First—All avenues run north and south.

Second—All streets run east and west.

Third—There are four division of the city, and the Streets and Avenues are named after their respective divisions.

Fourth—The number of the block is one more than the first figure of the street number.

NOTE—The arrangement in the following Street and Avenue Directory is in numerical order, with Avenues preceding Streets. Streets and Avenues not numerically named appear last in alphabetical order.

Where the odd and even numbers on an Avenue or Street are separated, the south side (odd numbers) on Avenues will appear first, and the west side (odd numbers) will appear first on Streets.

**DO YOUR EMPLOYERS FURNISH YOU WITH THE
LATEST EDITION OF THE CITY DIRECTORY?**

You need it at your elbow at all times, to protect your company from forgers and bad-check artists. A few questions, checked against City Directory information, will trip them at once. Intelligent use of the City Directory for this purpose has saved thousands of dollars and helped make some cities "too sharp" for bad-check "operators."

Caution . . .

Pay no money in advance to itinerant Directory Canvassers. We are led to mention this from the fact that certain parties have been fraudulently using our publications as specimens, and by that means collecting money in advance. Before signing an order, see that it has the name of the publisher of this City Directory printed thereon. We ask no payment until the work is delivered, and our solicitors have strict orders not to take advance payment for either advertising or subscriptions.

+ Clerks! +

DO YOUR EMPLOYERS FURNISH YOU WITH THE
LATEST EDITION OF THE CITY DIRECTORY?

You need it at your elbow at all times, to protect your company from forgers and bad-check artists. A few questions, checked against City Directory information, will trip them at once. Intelligent use of the City Directory for this purpose has saved thousands of dollars and helped make some cities “too sharp” for bad-check “operators.”

PLEASE! Do Not Lend Your CITY DIRECTORY

IT COSTS YOU MONEY Every Time It is Loaned

The practice of lending your City Directory, in a great measure, is responsible for the increasing cost of Directory Service.

The reason is:—

There is a definite cost involved in the making of the Directory of Your City.

This cost must be absorbed by the subscribers—be they one—or be they 1,000.

If there was but One Subscriber to the City Directory—the One Subscriber would of necessity have to absorb The Whole Cost.

If there were 1,000 Subscribers—each one would have to absorb 1/1,000 Part of the Whole Cost.

From which it is obvious that the Greater the number of subscribers—the Lesser the cost to each.

Every time you loan your City Directory the Less Necessity there is for the Borrower to subscribe for the Service.

More Borrowers result in Fewer Subscribers, which means Increased Cost.

HENDERSON'S Medicine Hat and Redcliff CITY DIRECTORY 1962

Copyright, 1962, by Henderson Directories Ltd.

For List of General Abbreviations see Opposite Page

EXPLANATION

Wives names are listed with husbands, the name of the wife is shown in parenthesis following the husband's as follows: Gregory Richd M (Mary L).

In case of a widow by death, wherever possible the name of the deceased husband is shown in parenthesis as follows: Gregory Mary L (wid Richd M).

The occupation and place of employment is listed as follows: Gregory Richd M (Mary L) slsmn Starr Clothing Co.

Names in **heavy type** denote advertisers in this City Directory.

Ownership or co-ownership of a firm is indicated by showing the individual's name in parenthesis following the firm name as follows: Carson Grocery Co (Geo B and Paul N Carson).

A firm name enclosed by parenthesis indicates ownership or co-ownership by the individual whose name precedes, as follows: Carson Geo B (Carson Grocery Co).

The head of the house is indicated by h preceding the street address, other members of the family and roomers are indicated by r preceding the street address.

IN ADDITION to names and addresses, your City Directory contains much detailed information concerning the people of your community. In order to list this information certain symbols and designations have been developed which enable important statistics to be compressed into the smallest possible space. You will receive far greater benefits from your City Directory if you familiarize yourself with the symbols and what they stand for.

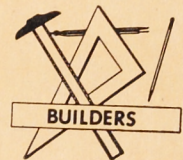

In checking credit applications, in conducting direct mail advertising programs, in planning sales campaigns, in building prospect lines, and in scores of other ways your City Directory will prove of invaluable assistance.

HENDERSON'S Medicine Hat and Redcliff

Directory of Householders, Occupants of Office
Buildings and Other Business Places,
Including a Complete Street
and Avenue Guide

1962

Copyright 1962, by Henderson Directories Ltd.

In the following list the numbered streets are arranged in numerical order followed by the named streets in alphabetical order, the intersecting streets being shown. The number of each building on the street is given in numerical order, and opposite the number is placed the name of the occupants or houseowner or tenant. In the business blocks containing offices the occupants are shown by room numbers where practicable, in apartment homes the number denotes the number of the apartment. The profession or business of individuals or firms is given only at their respective places of business; to find occupations of others refer to Alphabetical List of Names.

The symbol © following a householder's name indicates that we have received information during the canvass that the house is owned by some member of the family, but as the publisher cannot and does not guarantee the correctness of the information furnished, nor the complete absence of mistakes no responsibility for errors can be or is assumed, nor can the publisher furnish further information than that shown.

The symbol Δ preceding the names denotes houses having telephones.

(This section includes some listings reading "No Return". In each case the Publishers tried diligently, by various means, to obtain the information for the occupants but were unsuccessful. First two personal calls were made by an enumerator; next, a post card was mailed and the telephone used when possible).

(The numerals that appear at right edge of columns, ahead of street descriptions and some street intersections, are merely for the guidance of the publishers, and have no other significance.

Common Sense

About City Directory Circulation

THE TRUE VALUE of advertising circulation is circulation consulted.

TO BE EXACT—by actual survey in Canadian cities—for each City Directory, an average of three and one-half consultations were made for each business day.

TO BE CONSERVATIVE we will eliminate the sixty Sundays and Holidays when no tests were made.

FOR EVERY THOUSAND DIRECTORIES sold there will be an average of three and one-half daily consultations for each book for three hundred and five days, therefore—

$$1000 \times 3\frac{1}{2} \times 305 = \\ 1,067,500$$

Consultations or
